IF ROAD SPEED SIGNAL IS REQUIRED, MACK HAS A J1939 CAN BUS READER / KIT:

A J1939 CAN Bus Reader is required for ground speed, to take the multiplexed MPH signal and provide the signal to a salt spreader operation, for example.

This kit is required for Mack Granites (GR model, not GU) with mDrive and Mack Manual transmissions.

Not required for Allison transmission as the hard wired circuit is available at Wire #N125, Pin F of the Allison Body Builder connector.

Please contact Body Builder Support (877-770-7575) with a VIN number to order a kit.

SNOW PLOW PREP KIT

Mack snow plow harness is now available. Harness part number 23336821 can be ordered from your local Mack dealership. This is the short harness connecting chassis harness to snow plow light prep kit.

Revised 7/2/2018

SNOW PLOW PREP KIT, CONT'D

2018-Mack snow plow

Short harness must be made from
GT280 10-pin connector to plow lights
GR snow plow connectors:

25165542 conn – body builder side

85109655 term x9

20388118 seals x9

20388120 plug x1

20388011 conn - chassis side

20388119 term x5

20387770 term x5

20388118 seals x9

20388120 plug x1

MACK

STEER WHEEL CRUISE CONTROL SWITCHES – PTO ESC

GR Models - Steering Wheel Cruise Control buttons to enable PTO Engine Speed Controls at BodyLink III functionality - run Accessory Kit 85153488. This feature became standard in Mack Granite effective week 15 (April 9-13, 2018).
