

MACK

MACK® CONNECT® + LYTX®

SAFER DRIVERS. SOLID INSIGHTS.

Keep your drivers safe and protected while maximizing the efficiency of your fleet. Mack makes it easier and faster to add Lytx solutions to Mack LR, TerraPro™, and Granite® models with a factory-installed, pre-wire option that reduces your installation costs and streamlines your purchase.

MackTrucks.com/MackConnect

BORN READY.

PROTECT YOUR DRIVERS WITH INDUSTRY-LEADING TELEMATICS.

Lytx video telematics solutions help you maximize uptime and protect your business reputation while boosting driver safety, awareness, and education. These solutions combine predictive analytics, fleet telematics, and video coaching to help users correct risky behavior before a collision occurs. And now your trucks can come with a factory-installed wiring system on the Mack LR, TerraPro™, and Granite® - with factory warranty included. Simply plug in the Lytx event recorder (sold separately) and your system will be ready to go.

The Lytx solutions include:

- Full-service program implementation
- Program management and support
- Program, coach, and driver onboarding and training
- Prioritized coaching tasks
- Comprehensive safety and performance reports
- Industry benchmarking

Lytx Video Telematics Solutions

Continual recording comes standard with to your driver safety program for comprehensive video protection. Featuring configurable streaming video, Lytx gives you instant access to online footage that helps you quickly verify routes, identify risky behaviors, and resolve customer disputes in minutes.

Part of Mack Connect

The Lytx solutions are part of Mack's Connected Business fleet management systems. Our open platform sends vehicle data directly to your own fleet management software for analysis, enabling you to seamlessly use Lytx and other leading technologies that help you gain insights and drive profitability.
