

MACK *mDRIVE*™ TRANSMISSION FLUID 75W-80

Mack *mDRIVE* Transmission Fluid 75W-80 is a high-performance transmission oil for automated manual transmissions and extending drain intervals.

APPLICATION

Use in all automated manual *mDRIVE* transmissions and older VT-type gearboxes. NOTE: not to be used in overdrive transmissions (ATO) for which the higher viscosity version (75W-90) must be used.

Do not use in automatic transmissions (Allison transmissions in Mack FL or Powertronic in Mack FM) for which other fluids are available through the Ghent warehouse. See service information in IMPACT for more information.

Key Benefits of *mDRIVE* 75W-80 Transmission Fluid:

- The use of synthetic base oils and high-quality performance additives provide viscosity control and long oil drain capability.
- Provides improved fuel economy and reduces operating temperature.
- Effective oxidation resistance, even under severe conditions.
- Excellent protection against gear and bearing wear and surface fatigue (pitting).

Package Size	Description	Mack Part Number
Case with 3 x 1G Bottles	<i>mDRIVE</i> 75W-80 Transmission Fluid	MVBMMDRIVE75W80JUG
5 Gal Pail	<i>mDRIVE</i> 75W-80 Transmission Fluid	MVBMMDRIVE75W80PAIL
